

Huawei Smart Hotel Solution and TigerTMS Hotel Management System Interoperability Test Report

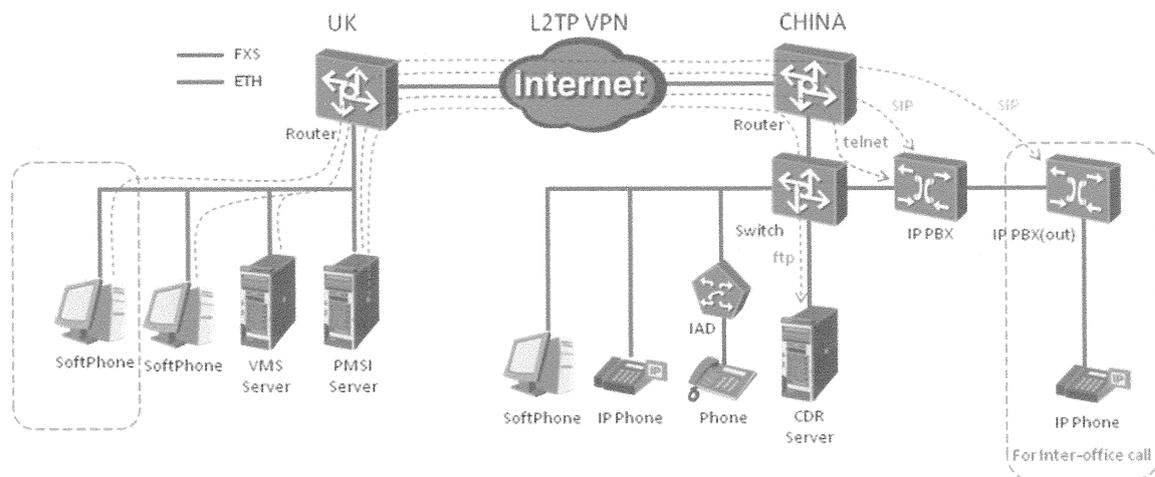

NO. HWEBGOPLAB01C130307001

1 Introduction to interoperability test

Huawei Smart Hotel Solution is aimed at helping hotels improve operational efficiency, lower operating costs, increase revenue opportunities and improve customer's satisfaction. It integrates unified communication service for hospitality.

TigerTMS is a global market leader in the provision of Telephony Integration Solutions for the hospitality sector. With 30 years of applications knowhow and focus, TigerTMS has over 15000 active global installations, providing services to at least 3 million hotel guest rooms from budget 3 star to the most renowned 6 star properties globally. TigerTMS is an important partner in unified communication service of Huawei Smart Hotel Solution.

The following figure shows the network of interoperability test. It's mainly composed of the foundation platform provided by Huawei and application software provided by TigerTMS. The platform includes network equipments, IP PBX, IAD, etc, and the application software includes PMSI (Property Management System Interface) and VMS (Voice Mail System).
